┐ Log

log is designed, as the name implies, to help you track your research: not just *what* you find, but *when* you research, *what* you go about it, and so on. That means is you **must keep it updated** as you research; it is an assignment to be completed rocess, as a genuine part of your work process, to document your search strategies and chosen sources. **Please note that t to this log!** In the first section, you'll follow the labels on the columns and make notes as you research. In the second sect se sources, enter and evaluate them section below. In other words, the first part of the log has you keep track of your resea second part has you record and evaluate **what you found**. **ADD ROWS TO THE LOG AS NEEDED!**

y a variety of search strategies and resources (ex. Google, Academic Search Complete, EBSCO, etc.). Keep an organized odology, sources consulted, key words used, noting both successes and failures so you don't repeat the same thing over an

Topic (name it & provide a very short description):

rches (Add rows as needed!)

t did you use to ch? (Google, base, etc.)	Search Terms/String Used	Number of results	How will you revise search based on results? How can you narrow it down to find even better results?	Notes: Did you select any s What are the sources abou free to use key words and abbreviations.)

rces and Notes (Add rows as needed!)

itation (APA style)	How does this source explain my topic? What information or perspectives does it present?	What is the point of view of the author? What are they trying to accomplish?	How / in what ways do y understand your topic because of this source?
